Review clarification

- If you present a paper, you don't have to review that paper
- But you should still review the other paper presented in the same class
- unless you want to use one of your 4 free passes

What is something you haven't understood?

- TCP fairness issues, and its very definition as we read Bob Briscoe paper. It seems that people haven't agreed yet what it's meant to be.
- The actual state-of-art design in the industry. What research ideas are incorporated into industry and what are not. For those not incorporated, what are the reasons that they are not adopted.

Projects

- Time until final report is due:
 - about 6 weeks
 - 10 classes
- Setting up a weekly meeting with me is a good way to promote steady progress.

Talks Tomorrow

George Candea, EPFL

Katerina Argyraki, EPFL

3-4pm, location TBA

4-5pm, 3403 SC

“Collaborative Vaccination in the Dimmunix Immunity Framework”

“RouteBricks: Exploiting Parallelism to Scale Software Routers”
