

CS 598: Advanced Internet

The Last Word

Brighten Godfrey

pbg@illinois.edu

Fall 2009

What remains

- Thursday | 1:59 pm: project report
 - Submit as PDF via email

- Dec 15 1:30 - 4:30 pm: Poster session
 - Location *still* TBA...

What I hope you learned

- **The classics:** how the Internet works
- **The latest:** how the Internet could work
- **The problems:** how the Internet doesn't work
 - a large and growing category!

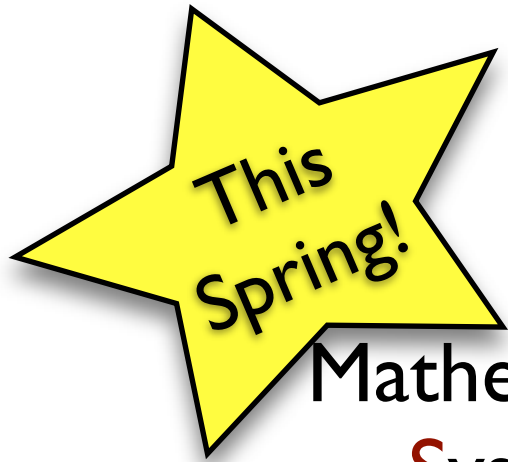

Where to go from here

- Find inspiration in the top conferences: SIGCOMM, NSDI, Hotnets, CoNext, IMC, ...
- “10 Networking Papers” series in CCR
- Chat with me anytime
- Create your own innovations!

CS591 FSN:

Flying Spaghetti Networks

CS591 FSN:

Mathematical **F**oundations and Tools for
System and **N**etworking Research

- Organized by Klara, Indy & myself
- Survey a set of topics, e.g.: Statistics, game theory, queueing theory, control theory, ...
- Learn the basics, key results, taste of a full course
- One hr/week, 1-2 lectures on each topic

Thank you!
